

# SUMMARY

I lead a team of students to create an online experience that would represent the 2020 graduating year of York University and Sheridan College Program in Design (YSDN). We had to compile a site showcasing 116 students who each had 3 to four projects each. Throughout our process, the Gradshow was interrupted by COVID, making the website the only experience of YSDN 2020.

# MY ROLE

I worked together with Taha Hossain in order to lead a hand picked team of 11 people to create the website. I was the principle developer and had a hand in coding each element of the site. For example, I hand coded the entire teaser site. A big part of this project was also managing the teams and keeping everyone on the same page and motivated. I also created a few tutorials and proposals
